BEVEL BLOCKS™

USA Illumination™

Complete Modular Lighting

Bevel Blocks. Total functionality and flexibility in multiple-lamp recessed luminaires. With downlights, adjustables, and wallwashers, designers can mix lamp sources and functions to fine-tune lighting based upon application requirements. Eleven lamp choices in thirteen combinations — trimless or with trim.

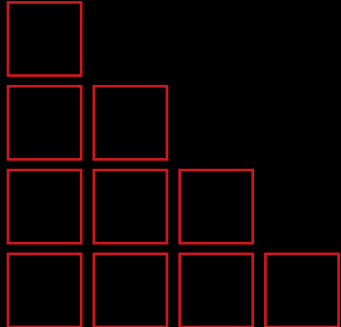

Shown without lens

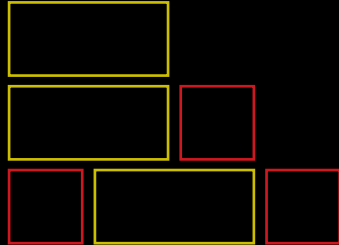

Configuration options

MR16—50W

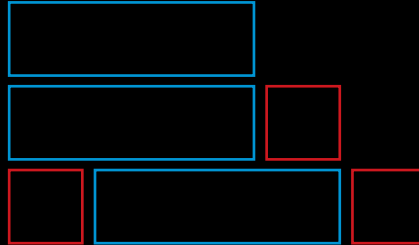

MH MR16—20/39W

CFL—26/32/42W PLT

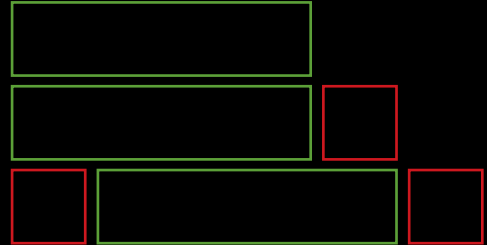

CFL—27W Biax

CFL—40/50/55W Biax

T5HO—24W

True Hot Aiming

Side-by-side regressed screws enable users to adjust vertical aiming and horizontal rotation from below, through the open aperture.

Hinged Trim

Simplifies relamping process by allowing for full access into housing compartment. Ball plungers ensure proper fit to ceiling plane.

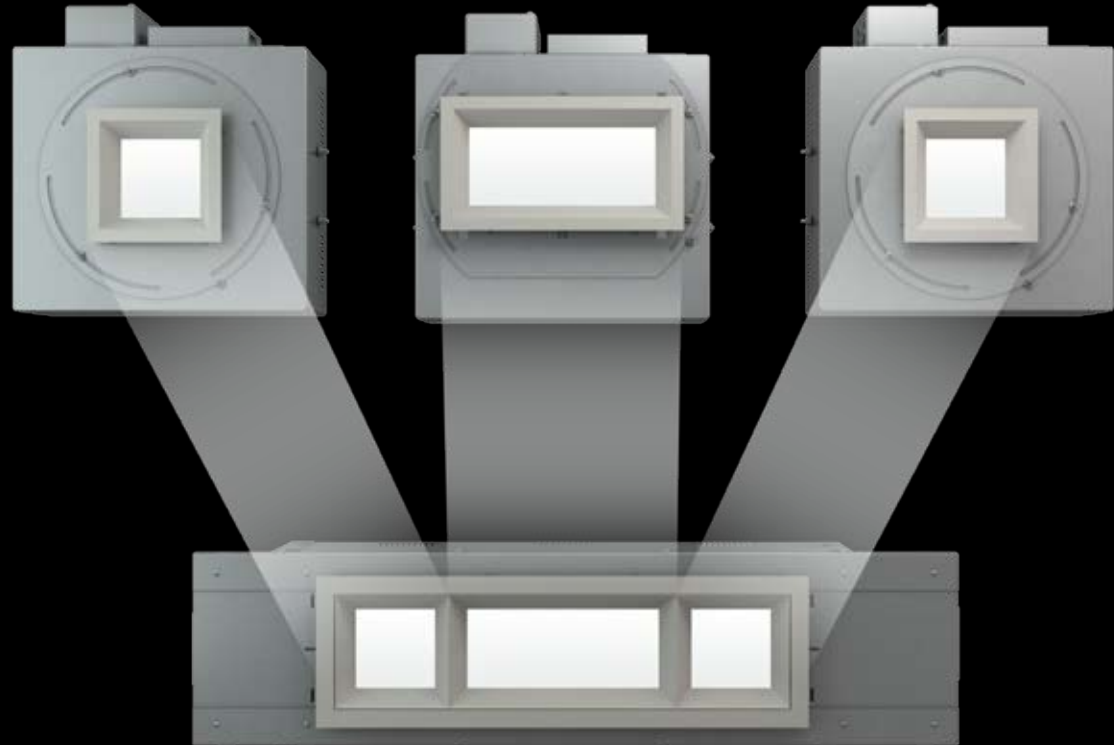

Plug-and-Play Optics

Our unique lamp assemblies create the ability to change between functions in the field. Downlight, adjustable, and wallwash modules are available for MR16 and MH lamps.

Organized Ceiling

Eliminate clutter from ceiling plane by integrating multiple functions and/or lamp sources into one luminaire.
